RENAULT LCV RANGE IN TOP 3 IN JANUARY

SCRAP MY VAN OFFER EXTENDED TO END FEBRUARY – NEW KANGOO FROM €8,990*, TRAFIC FROM €12,990* AND ALL NEW MASTER FROM €14,490*

Renault, Europe's best selling van range, made a significant jump to number three in the Irish LCV market in January, taking 13.4% of the total market.

Renault is delighted with last month's results. The mini van model the Kangoo was the most popular, the new Master was second best selling followed by Trafic. The award winning LCV range combined with the very attractive 5 year warranty unlimited mileage makes Renault LCV a very affordable proposition.

Good news for van owners of vehicles five years or older is that Renault's award winning LCV range will continue to be available through its **Scrap My Van** scheme until the end of February.

The van scrappage scheme gives owners the opportunity to purchase a new Renault van from just €8,990* and also avail of the **5 years unlimited mileage warranty as standard**, a major plus for all van owners.

Renault's '**scrap my van**' offer applies to light commercial vehicles aged 5 years and older, registered on the 28th February 2006 or before.

Having cleared the boards in the What Van? Magazine Awards, Renault's LCV range took four top awards including Van of the Year and Large Panel Van of the Year for the Master. Renault also received the Technology Award for its imminent Kangoo Van Z.E. *(Zero Emission) the world's first all-electric van developed and built by a vehicle manufacturer, which is already available to pre-order ahead of its November launch here.

Eric Basset, MD of Renault Ireland is confident the scheme and the new range will be a success.

"Renault vans have a good reputation Europe-wide and winning awards only emphasises the quality of the range. We fully revised our LCV range this year with prices starting from €8,990 with a 5 year unlimited mileage warranty across the range. We are, with our dealer network, determined as we are on the passenger market to offer more affordable vehicles with a great level of service to the Irish customer. It's great to see that more van owners are choosing Renault and we are very proud of our new range of LCVs with three versions of the Kangoo now available to suit different business types, the new Trafic with its increased performance 2.0 dCi engine and the all new design Master which comes in either front or rear wheel drive specifications and has one of the lowest running cost in its segment. Due to its popularity we have extended our Scrap My Van scheme for this month and we hope to see many more Renault vans on the road representing business owners of all sizes and sectors."
