

Press Release - 1 April 2011

Renault LCV in Top Two Best Sellers in March

Renault is delighted that its LCV range is in the top two bestselling van brands in March and this is not just down to the great prices and the very successful Scrap My Van scheme, according to Renault Managing Director Eric Basset.

“We are hearing great feedback from new owners of our van range, who tell us their Renault vans are actually saving them money and the lower running costs are a big thumbs up. Of course the five year extended warranty unlimited mileage is also a key component in our vans staying at the top of the list for the past few months. We are very proud of our new range of LCVs and they are proving very popular with our business customers”.

In the combined passenger and LCV market, Renault is still performing well at number four, with 9.7% of the market, up on this time last year.

Eric Basset, managing director, Renault Ireland:

“We at Renault are very pleased with our combined passenger car and LCV market share last month and overall for the year so far we are looking at market share of 9.7%. Scrappage is continuing on both passenger car and LCVs and we encourage those looking to buy a new Renault to go to our dealerships before the 20th April to place their order and make sure they benefit from the scrappage offer across our range before it ends”.
