-Renault LCV is No. 1 Bestseller in June -

Renault's LCV range was the number one best selling van range for the second time this year holding 20% of the overall market in June. Renault's new commercial offer has been well received by customers with over 1,000 LCVs sold this year. Key reasons for this performance include its new range of vans and the 5 years unlimited mileage warranty.

Good news also for passenger cars, with Renault at 12% market share in June, and its Clio best seller in the retail market.

In the combined passenger and LCV market, Renault is still performing well at number three, with 10.3% of the overall market to date.

Exciting months ahead for Renault Ireland, with news of its extension and doubling of scrappage for 2001 cars and older and the introduction of its ZE range of electric vehicles.

Hundreds of people will get the chance to drive the Fluence ZE and Kangoo ZE at its roadshows in Cork and Dublin over the coming weeks.

Renault's finance arm RCI Bank will also launch its finance offer in early September.

Eric Basset, managing director, Renault Ireland:

“ Good to see our LCV range in the number one spot again last month, and with the introduction of our Kangoo ZE range after the summer, we will have even more options for the Irish van driver. Renault Finance's introductory finance offer in September, and our continued double scrappage offer will also give van and car owners the chance to look at upgrading their vehicles”.
