An electric win for Renault

Renault Kangoo ZE wins Fleet Transport Green Commercial 2012

The Renault Kangoo ZE beat off stiff competition to win the Fleet Transport Green Commercial for 2012 at the annual fleet awards last night. For the fifth year running, the Fleet Transport Awards celebrate excellence in the road transport industries.

Renault Ireland's ZE campaign is powering ahead and their range of electric vehicles, affordable for all, will be launching in Ireland in November of this year, with the electric mini van – the Kangoo Express ZE - first to hit the streets.

The Kangoo Maxi ZE, a versatile vehicle, will also be available in two or five seats. Renault will have not just one, but three electric vehicles in the small van segment by the end of 2011, enabling business customers to choose the zero-emission vehicle that best suits their specific needs.
